Forecast for Monday 07 Sep 2020

Weather: Dry with clear spells during the early hours, with patchy mist and fog forming in the valleys. It will turn cloudy soon after dawn, and outbreaks of light rain will develop by midday. There may be some drier interludes in the afternoon, but outbreaks of drizzle will develop later and continue through the evening, especially in the west.

Chance of cloud free mountain/hill tops above 600m: 80% at first and through the morning with occasional patchy cloud near 600m, but falling to 50% in rain around midday as areas of cloud develop in rain nearer 500m. Deteriorating to 20% or less by evening as extensive cloud descends onto slopes above 400m, and with some patches as low as 300m in the west.

Visibility: Some poor visibility at lower levels at first due to patchy fog in the valleys. Otherwise good with some distant hills visible at first, but these views becoming misty in the rain, and occasionally obscured in drizzle later. Very poor visibility where cloud descends to cover the higher routes.

Meteorologist's View

The wind may occasionally gust 10mph stronger than indicated in the above table over summits and exposed ridges.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sun 06 Sep 2020	0mm	0.2mm	0.2mm

Forecast for Tuesday 08 Sep 2020

Weather: Cloudy, misty and damp for much of the day with outbreaks of mainly light rain and drizzle, especially across more exposed western areas of the Brecons. There may be some brief drier and brighter interludes during the afternoon, especially in sheltered eastern parts, but outbreaks of drizzle will return again during the evening.

Maximum wind: Westerly 25mph gust 35mph.

Chance of cloud free mountain/hill tops above 600m: 10% or less through the morning with cloud covering most slopes above 400m, and with patches down to 300m in the west. Perhaps improving to 50% in the east for a time during the afternoon as breaks develop in the cloud cover, but deteriorating to 10% or less again by evening.

Visibility: Generally moderate to poor, with views of even nearby hills hard to see and occasionally obscured, but perhaps becoming locally good in sheltered eastern parts in the afternoon. Very poor on most of the higher routes throughout the day.

Temperature: **Valleys:** Plus 12 Celsius becoming Plus 17 Celsius.
At 600m: Plus 13 Celsius.
Freezing level: Above the summits.
